

HACKORBIT

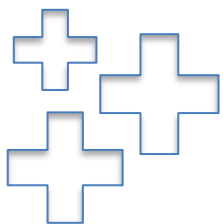

2025

THEME :- HealthCare Technology

PROBLEM STATEMENT :- Limited access to clear and immediate first-aid guidance during common medical emergencies often leads to delayed or incorrect responses.

PRESENTED BY TEAM :- Tech Med-Aid

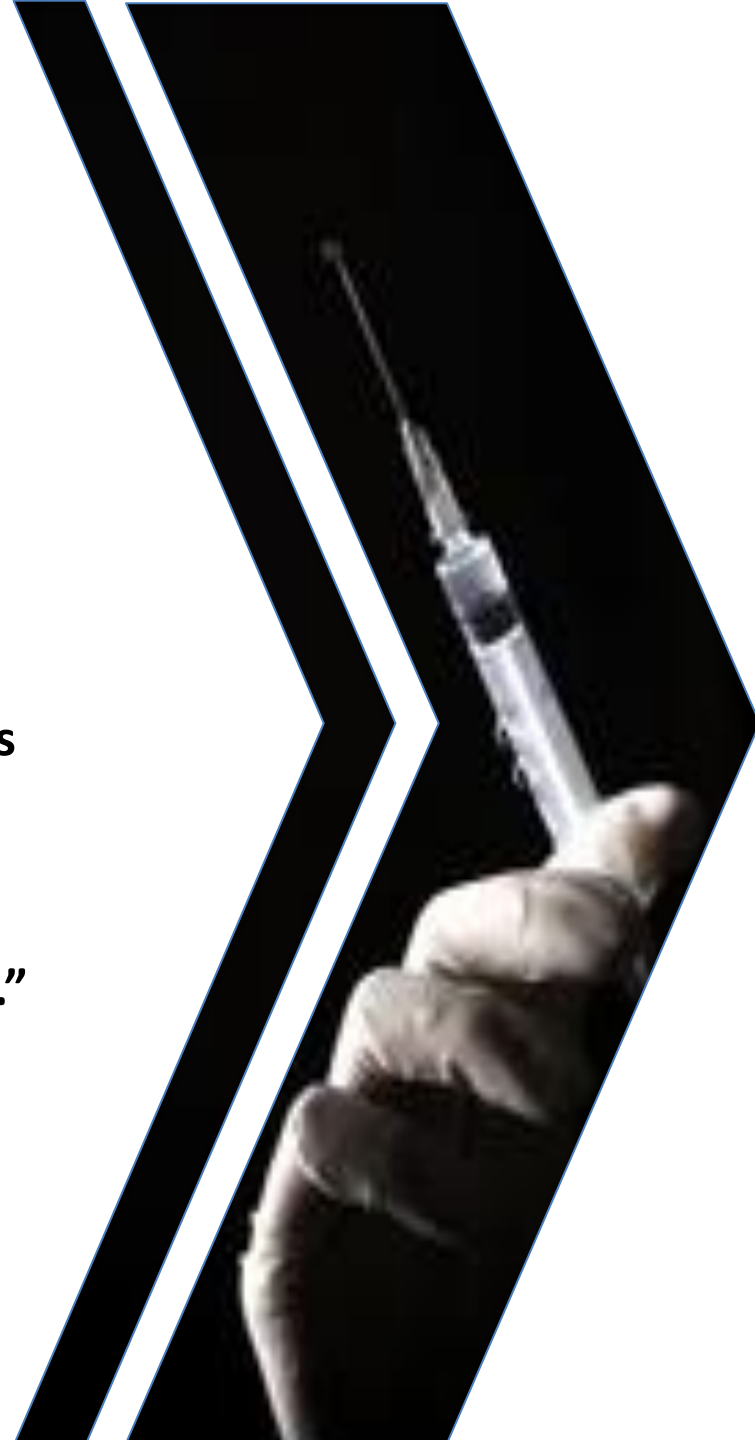

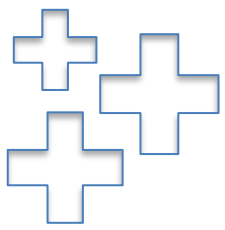

The Problem-

Millions are at risk due to:

- No quick access to first-aid guidance
- Panic & misinformation during emergencies
- Delays in response worsening outcomes

“A few seconds can save a life—lack of information shouldn’t be the reason for loss.”

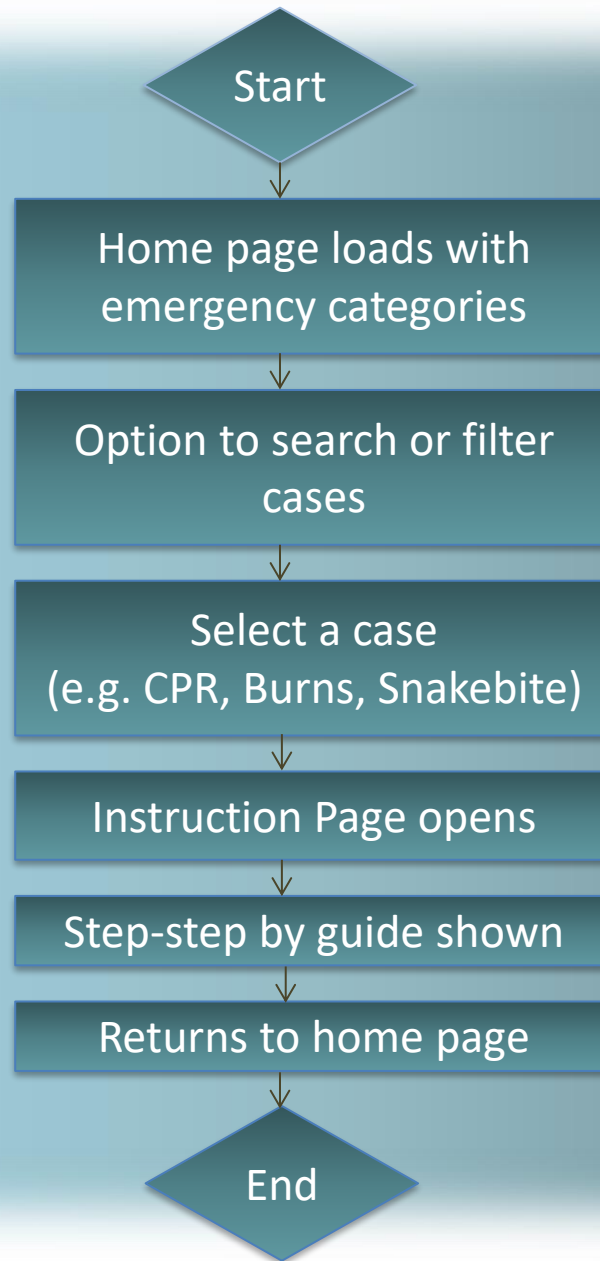

Proposed Solution-

INTRODUCING A WEB- “ ” WHICH PROVIDE IMMEDIATE INFORMATION IN COMMON EMERGENCIES.

- A lightweight, first-aid guidance web app.
- Doesn't require login or data.
- Covers common emergencies like burns, CPR, bleeding, choking, fractures, snake bite.
- Step-by-step visuals instructions.
- Works in panic mode.
- Quick response in emergency.

FLOWCHART

FLOW CHART EXPLANATION

- This flowchart illustrates the **user interaction flow** for the First-Aid Information Web App developed by Team Tech Med-Aid.
- The process begins at the **start screen**, where the **home page displays emergency categories** like CPR, burns, or snakebite.
- Users can then **search or filter** through the listed emergencies.
- After **selecting a specific case**, an **instruction page** opens.
- This page provides a **step-by-step visual guide** to assist the user in real-time emergency handling.
- Once the instructions are viewed, the user is **returned to the home page**, allowing for quick access to other cases.
- This simple and intuitive flow ensures quick and efficient access to life-saving information during emergencies

Features & Novelty-

- Built for urgent use cases with minimal clicks.
- Searchable list of emergencies.
- Opens instantly, no sign-in or downloads, no data collection (privacy first).
- Simple enough for non-tech users, elderly or children.
- Clear and simple instructions for quick actions.
- Internet searches show unverified or lengthy content which can worsen the situation.

Drawback & Showstoppers-

- User misinterpretation.
- Cannot provide live updates or connect to hospitals/ emergency networks.
- Cannot personalize instructions based on user condition or location.
- No interactive Q&A for symptom based help.
- Lacks multimedia.
